Application/Control Number: 10/720,634 Page 2

Art Unit: 3681

DETAILED ACTION

The following action is in response to communications filed for application 10/720,634 on April 15, 2005.

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Europe on November 25, 2002. It is noted, however, that applicant has not filed a certified copy of the European application as required by 35 U.S.C. 119(b).

Election/Restrictions

Claims 1-4, 7-8, and 12-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on April 15, 2005.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Janczak. With regard to claim 5, Janczak teaches an ICE having a crankshaft, comprising: a locking mechanism coupled to the crankshaft, said locking mechanism preventing crankshaft rotation (Abstract). With regard to claim 6, Janczak teaches the engine, wherein said locking mechanism comprises pins 4 that engaged with a gear 15 coupled to the crankshaft.

Claim Rejections - 35 USC § 103

Application/Control Number: 10/720,634

Art Unit: 3681

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Page 3

Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Janczak in view of Downs. With regard to claim 9, Janczak teaches a method for shutting down an ICE, comprising: stopping the engine in a predetermined rest position, Col. 1; and locking the engine in said predetermined rest condition via a locking mechanism (Abstract). Janczak lacks the specific teaching of the defined starting position. Downs teaches the method of stopping the engine 12 at a predetermined rest position, said position being defined such that motoring torque is decreasing during the first phase of restart (Col. 4); and locking the engine in the predetermined rest condition via a locking mechanism (via 14). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Janczak to employ the predetermined rest position in view of Downs in order to reduce compression vibration (Col. 1). With regard to claim 10, Janczak teaches the method wherein the locking mechanism prevents engine rotation. With regard to claim 11, Janczak teaches the method wherein said locking mechanism comprises pins 4 that engage with a gear 15 coupled to the crankshaft.8

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Roller, Gracyalny and Lasson have been cited to show similar engine locking mechanisms.

FACSIMILE TRANSMISSION

Submission of your response by facsimile transmission is encouraged. Group 3600's facsimile number is (703) 305-3597. Recognizing the fact that reducing cycle time in the processing and examination of patent applications will effectively increase a patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as the PTO's mail room processing and delivery time. For a complete list of correspondence not permitted by facsimile transmission, see MPEP 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses requiring a fee which applicant is paying by check should not be submitting by facsimile transmission separately from the check.

Application/Control Number: 10/720,634

Art Unit: 3681

Responses submitted by facsimile transmission should include a Certificate of Transmission

(MPEP 512). The following is an example of the format the certification might take:

I hereby certify that this correspondence is being facsimile transmitted to the Patent and Trademark Office (Fax No. (703) 305-3597) on ______ (Date)

Typed or printed name of person signing this certificate:

(Signature)

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and MPEP 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark Office. Submission of the original response or a follow-up copy of the response after your response has been transmitted by facsimile will only cause further unnecessary delays in the processing of your application; duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roger L Pang whose telephone number is 571-272-7096. The examiner can normally be reached on 5:30am to 4:00pm.

Art Unit: 3681

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor can be reached on 571-272-7095. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
